Thank you for purchasing iSWEEP products. This instruction manual provides necessary information for proper installation to prevent defects, malfunctions, and accidents from occurring. Please read and acknowledge all procedures before beginning installation. iSWEEP is not responsible for any injuries or death caused by the misuse or negligence of this manual and product.

【Front Lip Spoiler Installation】

1. Prop up Front Lip Spoiler to the bumper and inspect fitment.
2. Affix Front Lip Spoiler to bumper by temporarily taping it or have another person hold it in place. Remove the Front Lip Spoiler after marking the mounting holes.
3. Use a 3.5mm drill bit to make holes. (20 holes)
4. Remove the engine under cover and the left and right inner fender panels to make room to secure the Speed Nuts to the Tapping Screws. Support the Speed Nuts over the 3.5mm holes with a magnet if space is limited. *Make sure that the Speed Nuts are screwed evenly and flat at inside of the bumper lower panel.
5. Reinstall in reverse order all the components that were removed.
